PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience building responsive web applications using React, Node.js, MongoDB, and RESTful APIs. Strong technical foundation developed through Per Scholas software engineering training and a Bachelor's program in Computer Science, with prior experience in IT support and technical troubleshooting.

SKILLS

Languages: JavaScript, TypeScript, Java
Web & Frameworks: React, Node.js, Express.js, Spring Boot, HTML5, CSS3
Databases: MongoDB, Mongoose, SQL, NoSQL, Database Design
Tools & Platforms: Git, GitHub Actions, Netlify, Render, Visual Studio Code
Practices: RESTful APIs, JWT Authentication, Agile/Scrum, Unit Testing, Integration Testing, Secure Coding Practices, OWASP Top Ten
Machine Learning: TensorFlow, PyTorch, Scikit-Learn

EXPERIENCE

Fulfillment Associate Jun 2024 – Mar 2026
Amazon *Atlanta, Georgia*

- Picked, packed, and prepared 250–300 customer orders per hour while maintaining speed and accuracy in a fast-paced warehouse environment.
- Consistently met or exceeded daily productivity and quality goals, contributing to efficient order fulfillment.
- Collaborated with team members to improve workflow efficiency and support daily operational targets.

IT Support Technician Dec 2021 – May 2024
YeroEL Tech *Atlanta, Georgia*

- Diagnosed and resolved hardware, software, and peripheral device issues, minimizing downtime and restoring productivity for end users.
- Installed, configured, and maintained 50+ computers, software, and peripheral devices, ensuring reliable system performance and secure operation.
- Delivered technical support by troubleshooting user issues, deploying devices, and performing preventive maintenance to improve system reliability.

PROJECTS

TaskFlow https://pro-tasker-frontend-2tg4.onrender.com/login
Full-Stack Project Management Application

- Technologies: React, TypeScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Render | GitHub: github.com/mercytv932/Pro_Tasker
- Built a full-stack project management application using the MERN stack, enabling users to create, update, and manage projects and tasks.
- Built RESTful API endpoints with Express.js and MongoDB to support project and task CRUD operations.
- Implemented JWT authentication and authorization middleware to protect API routes and enforce project ownership.

Job Application Tracker https://job-application-tracker-qiad.onrender.com/ Jul 2026

- Technologies: HTML5, CSS3, JavaScript (ES6), Local Storage | GitHub: github.com/mercytv932
- Developed a job application tracking system with CRUD functionality, enabling users to add, edit, delete, and organize applications efficiently.
- Implemented real-time search, status filtering, and dashboard analytics to help users monitor application progress.
- Integrated Local Storage to persist application data across browser sessions without requiring a backend database.

EDUCATION

Per Scholas Atlanta, GA
Software Engineering Certificate. *Oct 2026*
Relevant Coursework: HTML5, CSS3, JavaScript, TypeScript, React, RESTful APIs, Express.js, Node.js, Java, Spring Boot, SQL, NoSQL, Git, Agile Methodologies, Software Testing, Cloud Deployment

Georgia State University Atlanta, Georgia
Bachelor of Science in Computer Science. Aug 2024 – Present. *Present*
